- Concepts: Data Structures & Algorithms, Object-Oriented Programming, Database Management

Personal Competencies:

- Problem-Solving Ability
- Teamwork and Collaboration
- Time Management
- Adaptability and Learning Mindset

Academic projects

Title: Travel Mate

Objective: The system enhances travel experiences by providing location-based and preference-based suggestions.

Description: It is a smart travel planning platform that helps users discover destinations, track visited places, and get personalized recommendations. It suggests nearby attractions, restaurants, and hotels along with estimated costs and activities.

Title: AI Based Resume Screening

Objective: To develop an AI-based system that screens and ranks resumes using ML and NLP to improve hiring efficiency and accuracy.

Description: It automates evaluation of resumes by extracting key information such as skills, experience, and qualifications. Using ML and NLP, it compares resumes with job requirements and ranks candidates accordingly. This helps reduce manual effort, saves time, and improves the accuracy of the hiring process.

Seminars/Certifications

- Attended the OSCODE seminar on Web and AI Connect
- Attended the GDG Devfest'25 in Noida

Achievements

- Amongst the top 50 teams in the [CodeSlayer Hackathon](#).
- Amongst the top 50 teams in the SIH Hackathon at College level.
